+++++
Club dues for 2018 -2019 are due July 1st!

Please send in early!

Tom Kopravich has the new top on his car.

Tom's rebuilt differential is ready

So I decided to cover it with an appliance grade "brushed stainless" adhesive.

Took many hours of drawing and test cutting to get an exact pattern in Autocad, used my laser to cut out a template.

What to do with a pitted Spyder dash?

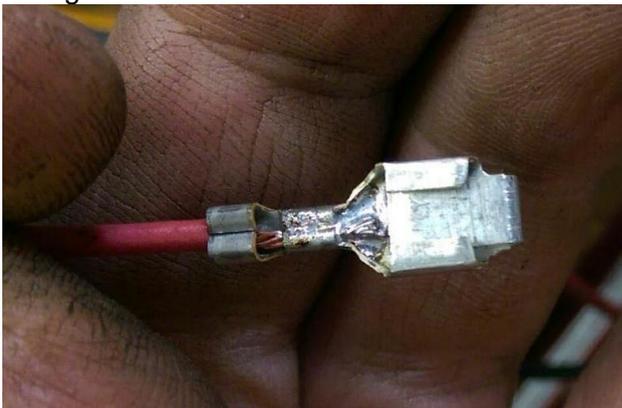

Took apart and/or sprayed all switches with deoxit to get full function back to everything.

I had a chance to get the tach dialed in and all looks good! I used a testing unit I had put together for a ecu that I built for my older BMW and it worked like a champ.

have basically redone the whole dash and under car wiring harness and replaced any questionable wires and replace any connectors that did not look good.

Probably when overboard on all the connections, tinned all the wires, put on new ends and then added a bit of solder to fully wet the connections.

Powder coated transmission cases.

Free to a good home:

2 engine access covers for FC

Trailer hitch for FC, Van, Rampside, Greenbrier. Note: this bolts to where the bumper bolts to the frame. You have to remove rear air grille to use this. Interested in any or all of the above? Make arrangements to pick up from Gary FREE! gswiatowy@rochester.rr.com

+++++

DON'T FORGET! Our guest speaker George Nash on Wednesday May 23rd at 7:30 PM at the Church. For those interested, dinner at Buffalo Wild Wings starting at 5:30 PM. No pizza at the church, sorry.

+++++
