Slot-style wheel for Datsun 280Z	14	6.0		4	0.4375	4.5	114.3			3.38	-0.13			14x6 Aluminum Slot-style wheels for a Datsun 280Z. Per Bryan Blackwell: Backspace is 3 3/8", which is about the same as stock Z wheels. The outer lip will be about 1" outboard from stock. A 185/70-14 or 195/70-14 should work well, there's a small chance the 195 would require a minor amount of clearing at the top of the wheel well.	
Nissan 280ZX wheels	14	??		4	0.4375	4.5	114.3		66.1	??				Tom Hughes: I've got Nissan 280ZX wheels (unknown backspace/from the local junkyard) on my '63 with 195/75-14 tires. With one coil out of the front springs I had to roll the front wheelwell lips to get clearance. The rears are fine as-is. However, I tried putting the rears on my daughter's '64 and they rubbed the fenders. Bob Tarpenning: I have the same wheels on my car [1964 coupe] but I don't have any interference problems.
